SUMMARY

Results-driven Software Engineer with 1.5 years of experience designing and delivering enterprise-grade AI and data solutions. Skilled in building scalable data pipelines, transforming complex business requirements into actionable insights, and developing analytics-driven applications. Experienced in collaborating with cross-functional teams to deliver reliable solutions in Agile environments.

EDUCATION

B.Tech. Computer Science — AI & ML Specialization

2021 – 2025

Vellore Institute of Technology, Chennai | CGPA: 8.54/10

PROFESSIONAL EXPERIENCE

Software Engineer

Jul 2025 – Present

Prodapt Solutions, Chennai

- Contributed to **Synapt**, Prodapt's internal AI accelerator, by developing **SPFX-React**-based UI components, debugging complex workflows, and implementing AI-driven features across multiple accelerator modules.
- Developed enterprise AI applications using Azure OpenAI, LLMs, AutoGen, and FastAPI, delivering production-ready REST APIs and scalable AI integrations for business applications.
- Participated in the development of **AgentCraft**, contributing to the implementation and integration of **IBM ContextForge** to enhance agent orchestration and enterprise AI workflows, while supporting the development of AI-driven solutions.
- Gained hands-on exposure to **CI/CD workflows using Jenkins** and foundational **DevOps** practices, supporting deployment and release activities.
- Partnered directly with cross-functional teams and business stakeholders to translate operational requirements into technical solutions, supporting data infrastructure needs and resolving data-related technical issues.

Software Engineering Intern

Jan 2025 – Jun 2025

Prodapt Solutions, Chennai

- Developed ReactJS/SPFX frontend modules integrated with REST APIs, enabling internal teams to access AI-powered enterprise services and real-time reporting through intuitive self-service interfaces.
- Contributed to cross-functional Agile sprints, consistently delivering sprint goals on schedule while reducing manual workflow steps and improving operational efficiency for end users.

CERTIFICATIONS & Achievements

AWS Cloud Practitioner Certification | AWS

Jan 2024

Awarded "Most Surprising Solution" for developing Swipe Scout, an innovative swipe-based skill ideation platform that helps recruiters

identify the best-matched employees. | Prodapt University Hackathon

March 2025

KEY PROJECTS

Enterprise Cloud FinOps Insights Platform

Power BI, DAX, Power Query

- Engineered an enterprise-grade analytics dashboard aggregating disparate multi-cloud billing records (AWS CUR and Azure Consumption data) into a unified, optimized Star Schema data model to expose infrastructure spending inefficiencies.
- Authored advanced DAX measures for Month-over-Month cost variance analysis and an anomaly detection engine utilizing a 14-day rolling average via standard deviation thresholds to visually flag sudden cost spikes.
- Developed self-service executive scorecards featuring dynamic Row-Level Security (RLS) that identified a baseline monthly cost-leakage of \$6,670 across 42 unattached storage disks and 7 underutilized VM instances.

AI Form Extractor for Medical Documents

Python, Gemini API, RAG, pytesseract

- Delivered an automated document intelligence pipeline combining OCR, RAG architecture, and LLM integration to transform unstructured medical PDFs into structured, queryable data, eliminating manual data entry.
- Built a compliance-grade, EHR-integration-ready pipeline supporting fact-driven decision-making from previously siloed, unstructured source documents.

FeatureSmith — Open-Source Python Package

Python, scikit-learn, pandas

Published on PyPI (MIT license) · pypi.org/project/featuresmith/

- Authored an ML/NLP library automating feature generation, selection, and data leakage detection, streamlining data modelling workflows and reducing development cycle time for analytics and production ML teams.

Real-Time Sign Language Detection

Python, TensorFlow, OpenCV, LSTM

- Delivered a real-time gesture recognition solution at 98.59% accuracy, demonstrating end-to-end deep learning and computer vision pipeline development from raw video data to actionable output.

TECHNICAL SKILLS

Data & Analytics:	Power BI, DAX, Power Query, Azure Databricks, PySpark, Data Modelling, Data Pipelines, Real-Time Dashboards
AI / NLP / ML:	LLM Integration, RAG, Feature Engineering, AutoGen, Crew AI, Langchain, LangGraph, Azure AI Foundry
Backend & APIs:	FastAPI, Node.js, REST APIs, WebSocket, Express.js
Frontend:	ReactJS, Next.js, SPFX, TypeScript, HTML5, CSS3
Programming:	SQL, Python, JavaScript, TypeScript, C++
Databases & Tools:	MySQL, Neo4j, PostgreSQL, Git, Linux, Vercel
