

ABHISHEK PANIGRAHI

Software Engineer

+91-7991099606 | abhishekanigrahi2244@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with hands-on experience in NLP, LLM integration, and Generative AI development. Proficient in RAG-based systems, text processing pipelines, and scalable backend APIs using FastAPI and Python.

EDUCATION

Vellore Institute of Technology, Chennai

CGPA: 8.54

B.E. Computer Science, AI & ML Specialization | 2021 – 2025

TECHNICAL SKILLS

NLP & AI/ML: NLP, Text Processing, RAG, LLM Integration, Generative AI (Autogen, Gemini API), TensorFlow, LSTM, featuresmith

Programming: Python, JavaScript, C++, SQL

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, WebSockets

Frontend: ReactJS, Next.js, SPFx, HTML5, CSS3, TypeScript

Databases & Tools: MongoDB, MySQL, Git, Linux, Vercel

EXPERIENCE

Software Engineer — Prodapt Solutions, Chennai | *Jul 2025 – Present*

- Built Generative AI and NLP-driven applications using LLM integration, Autogen framework, and FastAPI
- Delivered end-to-end AI solutions — from NLP preprocessing pipelines to deployment-ready REST APIs

Software Engineering Intern — Prodapt Solutions, Chennai | *Jan 2025 – Jun 2025*

- Built ReactJS/SPFx frontends and integrated REST APIs for AI-powered enterprise services

MERN Full Stack Certification — *Ethnus Training Center* | *December 2023*

PROJECTS

AI Form Extractor for Medical Documents | *Python, Gemini API, RAG, pytesseract*

- Built NLP + OCR pipeline (RAG + pytesseract) converting unstructured medical PDFs to structured JSON
- Integrated Gemini LLM for medical NER, tokenization, and clinical entity extraction from prescriptions

FeatureSmith – Open-Source Python Package | *Python, scikit-learn, pandas, LightGBM*

[Project Link](#)

- An open-source ML/NLP Python package (PyPI, MIT) that automates feature generation (polynomial, interactions, encoding, datetime extraction), feature selection (RFE, permutation importance, correlation), and data leakage detection — designed to streamline Kaggle and production ML pipelines.

MPLOYEE – Employee Management System | *ReactJS, ExpressJS, MongoDB*

- Full-stack MERN app with lazy loading and code splitting, improving load performance by 40%
- REST APIs for CRUD, authentication, role-based access control with real-time dashboards

Real-Time Sign Language Detection | *Python, TensorFlow, OpenCV, LSTM*

- LSTM-based gesture recognition (98.59% accuracy) with real-time OpenCV video processing pipeline
