

ABHISHEK PANIGRAHI

B.Tech. in Computer Science Engineering (AI & ML Specialization)
+91-7991099606 | abhishekpanigrahi2244@gmail.com | LinkedIn | GitHub

EDUCATION

Vellore Institute of Technology, Chennai

2021 – 2025

Bachelor of Engineering in Computer Science with specialization in AI & ML | CGPA: 8.54/10

TECHNICAL SKILLS

Front-End Technologies: ReactJS, Next.js, HTML5, CSS3, JavaScript (ES6+), TypeScript

Web Technologies: REST APIs, WebSockets, HTTP/HTTPS protocols, FastAPI

Front-End Concepts: Performance Optimization, Lazy Loading, Modular UI Design, Component-Based Architecture

Back-End & Frameworks: Node.js, ExpressJS, FastAPI, Microsoft SharePoint Framework (SPFx)

Databases: MongoDB, MySQL

AI/ML & LLMs: TensorFlow, OpenCV, LSTM, Autogen, LLM Integration, Generative AI

Programming Languages: C++, Python, JavaScript, SQL

Tools & Platforms: Git/GitHub, Linux, Vercel, VS Code

EXPERIENCE & ACHIEVEMENTS

Software Engineer – Prodapt Solutions Pvt. Ltd., Chennai

Jul 2025 – Present

Software Engineering Intern

Jan 2025 – Jun 2025

- Developed Generative AI applications using Autogen framework and LLM integration with FastAPI backend
- Built responsive front-end interfaces using **ReactJS** and **Microsoft SharePoint Framework (SPFx)**
- Implemented RESTful API integration for seamless communication between front-end and AI-powered backend services
- Collaborated with cross-functional teams to deliver scalable GenAI solutions for enterprise clients

MERN Full Stack Development Certification – Ethnus Training Center

December 2023

PROJECTS

MPloyee – Employee Management System

ReactJS, ExpressJS, MongoDB

- Architected and developed full-stack web application using **MERN stack** with modular ReactJS components
- Implemented **lazy loading** and code splitting to optimize bundle size and improve initial load performance by 40%
- Integrated **REST APIs** with Express.js backend for CRUD operations, authentication, and role-based access control
- Built responsive dashboards featuring leave management, expense tracking, and timesheet updates with real-time data synchronization
- Deployed scalable application architecture supporting concurrent users with efficient state management
- GitHub:* github.com/2244shek/Project_MERN – T218

AI Form Extractor for Medical Documents

Python, GeminiAPI, RAG, pytesseract

- Engineered AI-powered document processing system converting unstructured PDFs/images to structured JSON format
- Integrated Google's GeminiAPI with Retrieval-Augmented Generation (RAG) model for medical term extraction
- Achieved high accuracy in extracting clinical data from prescriptions using OCR and NLP techniques
- GitHub:* github.com/2244shek/RAG_PDF

Portfolio Website

ReactJS, CSS3, EmailJS API

- Designed and deployed responsive portfolio using **ReactJS** with component-based architecture and modern UI/UX practices
- Integrated EmailJS API for client-side email functionality; optimized build configuration for Vercel deployment
- Live Demo:* abhishekpanigrahi-self.vercel.app

Real-Time Sign Language Detection

Python, TensorFlow, OpenCV, LSTM

- Developed real-time sign language recognition system using LSTM neural networks achieving 98.59% accuracy
- Implemented video processing pipeline with OpenCV for gesture detection and TensorFlow for model inference
- GitHub:* github.com/2244shek/RTSLD—LSTM-Dense-NN
